

VacuCobra VC100 shrink wrapped goods

Project nr:
2739
Client:
Printing industry
Project supervisor:
Mark Roberts, TAWI UK, England
Project engineer:
Mikael Kayser TAWI AB

VacuCobra model VC100 with max capacity 35 kg and equipped with adapter swivel and special 4-cup suction foot 2739, to lift shrink wrapped printed material.

The VacuCobra handles these wrapped packages weighing between 15-20 kg with great ease.

The 4-cup foot is a better choice than the standard suction foot when the shrink wrapping is not always tight around the bundle.
